Address: Mumbai, India

SUMMARY

Second-year Computer Engineering student with a growing interest in full-stack web development. Familiar with building and deploying web applications using React, Supabase, and PostgreSQL, often leveraging AI-assisted development tools. Have explored integrating third-party AI APIs (Gemini, OpenAI) into projects and am currently learning machine learning fundamentals.

EDUCATION

KJ Somaiya School of Engineering — AVG CGPA: 8.70

Mumbai, Maharashtra

B.Tech in Computer Engineering

August 2024 – May 2028

Relevant Coursework: Data Structures & Algorithms, OOP, Analysis of Algorithms, Web Programming, DBMS, Discrete Mathematics

EXPERIENCE

Machine Learning Intern

June 2025 – August 2025

Wayspire Ed-Tech Pvt Ltd

Remote

- Assisted in building basic ML models using Python and Scikit-learn for text classification tasks, including TF-IDF feature extraction and Logistic Regression on structured datasets
- Gained introductory exposure to computer vision tasks using OpenCV; observed model training and evaluation workflows under guidance

Social Media Manager

2024 – Present

Awesome Kids International Preschool

Mumbai, India

- Helped grow Instagram engagement by 30%+ through consistent content planning; managed a calendar of 10+ posts/month covering admissions and school events

Marketing Team Member

October 2024 – Present

Somaiya Machine Learning and Research Association (SMLRA)

Mumbai, India

- Contributed to sponsorship outreach and marketing efforts for ML workshops and events attended by 100+ students

PROJECTS

Expenzo – AI Financial Assistant | *React, TypeScript, Supabase, PostgreSQL, Gemini API*

GitHub — Live

- Integrated Google Gemini API to provide natural language financial insights from user-uploaded bank statements via a conversational interface; used prompt engineering with AI assistance
- Built a React/TypeScript frontend with Supabase/PostgreSQL backend for user authentication and persistent data storage

Parent Portal – Preschool Management System | *React, TypeScript, Supabase, PostgreSQL, RBAC*

Live

- Developed a portal with JWT-based authentication and role-based access control (RBAC) for parents and administrators; currently live in production with 150+ active users
- Used Supabase backend with SQL-based data handling to support real-time student updates

Awesome Kids Preschool Website | *React, TypeScript, Supabase*

Live

- Built and deployed a responsive, database-backed official website to support digital admissions outreach for the institution

Resume Screening Tool | *Python, Scikit-learn, NLP, TF-IDF*

GitHub

- Built a basic ML pipeline to rank resumes using TF-IDF vectorization and Logistic Regression; applied NLP preprocessing steps including tokenization and stopword removal

TECHNICAL SKILLS

Languages: Python, Java

Frontend: React, JavaScript, HTML5, CSS3, Responsive Web Design

Backend: Supabase, PostgreSQL, SQL

AI API Integration: Gemini API, OpenAI API, Prompt Engineering

Concepts: Data Structures & Algorithms, OOP, RBAC, SDLC

Familiar With: TypeScript, Node.js, REST APIs, Scikit-learn, TensorFlow, OpenCV

Tools: Git, GitHub, VS Code, Vercel

CERTIFICATIONS

IBM Machine Learning with Python – IBM

August 2025

Machine Learning Internship & Training Certificate – Wayspire Ed-Tech Pvt Ltd

August 2025
